

## PRESS RELEASE

### **ORNX Signs Major Agreement with the Moroccan Government**

Rabat, February 5th, 2026 – ORNX has officially signed the **Preliminary Land Reservation Agreement (CPRF)** with the Government of Morocco for the development of its first low-cost ammonia project. The agreement was signed in Rabat, with ORNX represented by its Managing Directors, **Peter A. Gish** and **Pablo Pulpeiro**, during a ceremony chaired by the the Head of Government of Morocco, in the presence of the CEO of MASEN (Moroccan Agency for Sustainable Energy) and the deputy chief of mission of the United States Embassy to Morocco.

This signature marks an important milestone **and reflects the broader momentum driven by the strategic vision of HM King Mohammed VI to position Morocco as a global leader in the hydrogen sector**, through the Green Hydrogen Moroccan Offer.

Since its creation in 2022, ORNX has operated with the conviction that Morocco offers a unique framework for developing a globally competitive hydrogen industry. ORNX's selection as one of the developers retained by the Steering Committee of the "Offre Maroc " recognizes this work and supports the next stages of project development.

Located in **Laâyoune**, the ORNX project aims to produce **100,000 tons low-cost hydrogen** which will be converted into approximately **560,000 tons of low-cost ammonia per year**. ORNX will continue to work closely with MASEN and Moroccan authorities and stakeholders to advance this large-scale strategic project.

## Leadership Statement

**Peter A. Gish, Managing Director of ORNX & Co-Founder of Ortus Climate Mitigation:** *"We are honored to take this important step in partnership with the Moroccan government. The signing of this agreement marks another milestone in our journey, strengthening our commitment to Morocco's energy future and paving the way for strategic partnerships essential to realizing our vision: positioning Morocco as a global hub for the production and distribution of low-cost hydrogen and its derivatives."*

### About

### ORNX

ORNX is an international consortium bringing together Ortus Climate Mitigation (USA) and ACCIONA-Nordex Green Hydrogen (Spain-Germany), aiming to develop an integrated platform for the production of low-cost hydrogen and ammonia in Morocco. This project aims to meet the demands of national and international markets for hydrogen and its derivatives.
